

# Practice Assignment: W01-1\_08-31-0

---

## CISC 3120 Section ER6 Design and Implementation of Software Applications I

Having observed the demo (the screen casts) of the instructor, you will need to complete the steps below for this assignment,

1. Accept the assignment invitation. Below is the assignment invitation,

`https://classroom.github.com/a/NXpRsJhT`

Watch the screencast at `https://youtu.be/MyE7Hfpzhmw` for reference.

2. Install a Git client. The instructor recommends the command line Git client and it can be download from the URL below,

`https://git-scm.com/downloads`

3. Clone the project. Generally, you only need to do this *once* for every computer. Watch the screencasts at `https://youtu.be/Hs40iGnY7qc` and `https://youtu.be/Anar12iDTsU` for references.
4. Locate your project on your disk, create a folder matching the name of the assignment, i.e., `W01-1_08-31`.
5. In the drectory of the assignment, create a simple text file, call it `hello.txt`. The content of your file are two lines formatted as follows, if your name were John Doe and your Github username `cisc3120demo`,

```
Github Username: cisc3120demo
Name: John Doe
```

The screencast uses `echo` to create a new file. You can use any editor, such as `notepad` on Windows.

6. Add the the file to the repository.
7. Commit the change.
8. Push the local repository to Github.
