Practice Assignment: W03_09-14_2

CISC 3120 Section ER6
Design and Implementation of Software Applications I

This assignment is (1) to help you review the concept of `Array` and `ArrayList` in Java and (2) to help you gain experience of using Java API documentation.

This assignment is based on the *incomplete* code at the `ArrayArrayListDemo` Maven project in the `sampleprograms` repository.

You are required to complete the `TODO`'s in the code.

Submit your work by pushing your code to Github. The submission deadline is posted at the class website and in the announcement in Blackboard. You must organize your repository as required.
